Dubai, UAE

About Us

Founded in 2022 and headquartered in Dubai, **Infinite Icon Technology** is an IT consultancy built for the pace of the UAE and African markets.

We work with banks, government entities and fast-growing businesses that need technology to move as fast as their ambitions — a **strategic technology partner, not just a vendor.**

Our Approach

We design and implement the technology, and we train the people who will run it. That combination of advisory and capability building is what makes transformation stick after the project team leaves.

Our Promise

Every engagement ends the same way: your team able to run it without us.

Where We Work

We run engagements from a UAE base while maintaining delivery relationships across African markets, bringing the same standard of governance to both regions.

United Arab Emirates HOME BASE

Headquartered in Dubai, serving clients across the Emirates in banking, government and enterprise sectors.

Dubai · Abu Dhabi · Sharjah

Africa DELIVERY REACH

Corporate training and digital transformation engagements delivered on site and remotely across the continent.

Ethiopia · Djibouti · South Africa

Range of Specialization

Everything we do sits under two practice areas, designed to reinforce each other.

IT Consulting

- Cybersecurity & Risk Advisory
- IT Infrastructure
- Cloud Solutions
- Managed Services
- POS, ERP & Cash Registers
- Software & Systems Development

Corporate Training

- Leadership & Presence
- Strategy & Governance
- Resilience & Risk (ERM)
- Banking & Treasury
- Digital Transformation
- EI & Communication

Who We Serve

Regulated, high-stakes sectors where downtime, non-compliance and untrained users carry real cost.

Banking & Finance

Digital banking, payments, compliance

Government

Public sector digital services

Energy & Utilities

Infrastructure & OT modernisation

Telecommunications

Network & systems advisory

Insurance

Process automation & risk

Logistics & Trade

Systems integration

Education

Digital skills programmes

Enterprise & SME

Complete transformation

IT Consulting

Advisory, infrastructure and practical support that keeps your systems secure, current and running.

Cybersecurity & Risk Advisory

Risk assessments, security architecture and staff readiness programmes that reduce exposure without slowing the business down.

IT Infrastructure

Networking, data processing and storage, and systems operations designed, deployed and supported end to end.

Cloud Solutions

Migration, architecture and management across public, private and hybrid cloud environments.

Managed Services

Ongoing monitoring, maintenance and support so internal teams can stay focused on the business.

POS, ERP & Cash Register Support

End-to-end supply, installation and support for point-of-sale, ERP and cash register systems — hardware and software.

Software & Systems Development

Custom applications and integrations that connect your technology to how the business actually operates.

POS, ERP & Cash Registers

Supplied, deployed and supported — one accountable partner across procurement, rollout, integration and the support desk.

We supply, install and support point-of-sale, ERP and cash register environments end to end, covering both the hardware estate and the software that runs on it. Our own ICON range of certified terminals is configured, deployed and maintained by our team.

01

Supply & procurement

Terminal selection from the ICON range and fleet specification.

02

Deployment & installation

Site rollout, configuration, key injection and staff handover.

03

Integration & software

ERP, cash register and back-office integration into existing systems.

04

Maintenance & support

Monitoring, spares, fault resolution and refresher user training.

Corporate Training

Executive and management programmes for banks and financial institutions, delivered with specialist international faculty.

Leadership & Executive Presence

Executive Leadership Presence and Women in Leadership — building confident, visible leaders at every level of the bank.

Strategy Execution & Governance

Turning strategy into results, with the governance frameworks that keep boards and management accountable for delivery.

Organizational Resilience & Enterprise Risk

Organizational Resilience and Enterprise Risk Management (ERM) — preparing institutions to anticipate, absorb and recover from disruption.

International Banking, Treasury & Capital Markets

International Banking, Mastering Treasury Functions and Capital Markets — the disciplines behind a bank's balance sheet and cross-border business.

Digital Transformation & Innovation

How banks plan, lead and deliver digital change — from customer channels and operating models to a culture of innovation.

Emotional Intelligence & Communication

Emotional Intelligence for Bank Management and Communication Skills for managers who lead people and client relationships.

Delivered in Seven Countries

Programmes are run on site and remotely, adapted to the language, infrastructure and regulatory context of each delegation we train.

Delegation roundtable, delivered on programme

04 United States

North America

05 Canada

North America

06 Ethiopia

Africa

07 Sweden

Europe

Role-based curricula

Content is mapped to job function, so each cohort learns what it will actually use.

Delivered alongside build

Training runs in parallel with implementation, not as an afterthought.

Refresher cycles

Follow-up sessions keep capability current as systems and threats change.

How We Work

Four stages, run the same way every time. Transformation only holds if the sequence is right: assess before you build, and train while you build — not after.

STAGE 1

Assess

Audit current systems, skills and processes against your business objectives to find the most impactful starting point.

STAGE 2

Design

Architect the technical solution and the training curriculum together, so capability is built in from day one.

STAGE 3

Deliver

Implement infrastructure, software and platforms while running the training programme in parallel with your team.

STAGE 4

Sustain

Managed support, refresher training and roadmap reviews keep the transformation compounding after launch.

Assess before you build. Train while you build. Sustain after launch.

Engagement Models

Three ways to start, one standard of delivery.

Advisory

A defined engagement to assess, architect or de-risk a specific part of your technology estate.

- Current-state audit
- Target architecture & roadmap
- Security & compliance review
- Vendor and platform selection

Delivery

Full implementation of infrastructure, platforms or systems, with training run in parallel.

- Infrastructure & cloud build
- Software & systems development
- POS, ERP & cash register rollout
- Managed support after launch

Training

A standalone programme for a team or delegation, scoped to role and delivered on site or remotely.

- Needs assessment & cohort mapping
- Custom curriculum design
- On-site or remote delivery
- Post-programme refreshers

Every engagement — whichever model it starts as — ends the same way: your team able to run it without us.

Payment Software Platform

Alongside the hardware, IIT deploys and operates the software that keeps a terminal estate secure, up to date and profitable — in the cloud or on the client's own servers.

Application Marketplace

A single IoT platform combining terminal management, application management and value-added services. It connects acquirers and operators, application developers and ISVs, asset managers and merchants in one open, collaborative ecosystem.

Terminal Management System (TMS)

Remote management, terminal deployment, device status monitoring and remote support for every terminal type — including terminals from other manufacturers already in the field.

Efficient terminal management

Single and batch deployment with flexible configuration options.

Complete application management

Upload, publish, query and update applications from one console.

Real-time monitoring

Track device status, configure and maintain terminals remotely.

Flexible user management

Role-based access rights for data security and compliance.

Intelligent operations

Monitoring data that supports faster, better operating decisions.

Public or private deployment

Hosted cloud service, or a private instance at the client site.

Security & Remote Support

Remote Key Injection (RKI)

Secure batch download of payment keys to POS terminals over PCI-compliant encrypted channels — no technician on site, and every terminal kept to the latest certification requirements.

Remote key download

Inject keys into terminals in batches from the back office.

Lower labour cost

No need for staff to be physically present at each terminal.

Central certificate management

Unified management of keys and certificates.

Data security

Strict encryption preserves key confidentiality and integrity.

Remote Assistance

Remote desktop access to POS terminals through the management platform, so our support team can resolve merchant issues immediately — without a site visit.

Remote diagnostics

Locate device problems precisely and apply a fix.

Remote desktop control

Solve issues online by controlling the terminal.

Encrypted tunnel

Secure connection protects every session.

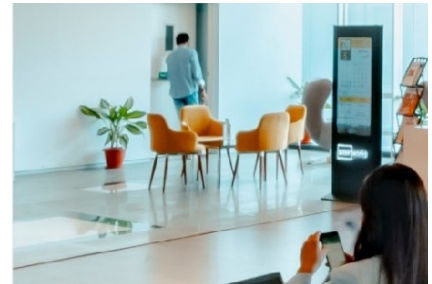

Remote log extraction

Pull live or historical logs for diagnosis.

Integration & Acceptance

Cloud ECR Integration

Orders created at the cash register are pushed over a wireless network to a cloud platform, then sent to the POS terminal for payment — no cables and no drivers to install.

Wireless

No cables or drivers between the till and the terminal.

Works with any terminal

Connects to any brand of POS terminal (4G recommended).

Fast push

Orders and results pushed in seconds.

SoftPOS — Tap on Phone

Turns an Android smartphone into a secure contactless payment terminal, built to the MPoC standard with real-time security monitoring.

- Card, QR code and e-wallet payments
- Email or SMS receipts
- Requires Android 10+ with built-in NFC

Acquiring & Switching Platform

Card issuing and acquiring system services for banks and payment institutions.

- Merchant, terminal and card management
- Transaction routing and risk control
- Clearing, settlement and reporting

ISO 9001:2015 Certification

Infinite Icon Technology L.L.C has been assessed and registered as conforming to **ISO 9001:2015 — Quality Management System.**

VERITAS

CERTIFICATE

OF REGISTRATION

This is to certify that the Management System of

Infinite Icon Technology L.L.C

Office No 203, Albahar, Al Khabeesi, Deira, Dubai, United Arab Emirates.

Scope of Certification

Data management and cybersecurity services; IT infrastructure; cloud and datacenter services; IT network services; data classification and analysis; computer systems and communication equipment software design; education and training; application development and web design.

Why Choose Us?

Centred on the client

Solutions scoped to your team, your budget and your regulatory environment — not a standard playbook.

Built to scale

Modular architectures and curricula that extend as you grow into new markets and business lines.

Regional fluency

Attention to local infrastructure realities, compliance regimes and talent across the UAE and Africa.

Certified quality

An ISO 9001:2015 quality management system governs how we plan, deliver and improve.

Proven in banking

500+ POS terminals deployed and executive programmes delivered for leading banks and financial institutions.

One accountable partner

Procurement, rollout, integration, training and support — one team from start to finish.

“Advise, deliver, train, sustain.”

LET'S WORK TOGETHER

Ready to build the capability behind your next transformation?

Tell us about your training needs or your technology roadmap, and our team will reply directly. We typically respond within one business day.
