

INFINITE ICON TECHNOLOGY · DUBAI, UAE

CORPORATE TRAINING CATALOGUE

Role-based programmes that build the skills to run and sustain your technology long after we leave.

EDITION 2026 · SIX PROGRAMMES

Infinite Icon Technology LLC · Dubai, United Arab Emirates · infiniteicontech.com

CERTIFIED
ISO 9001
: 2015
QUALITY

Contents

How we train, the quality system behind it, the six programmes in detail, and how a programme is scoped and run.

01

Our Training Approach

Role-based design, delivery in action, formats and coverage

02

Quality Assurance

ISO 9001:2015 certification, certified scope and controls

03

The Programmes

Six courses plus custom programme development

04

Pathways & Tailoring

Role pathways and sector-specific adaptation

05

Running a Programme

Scoping, delivery, assessment and what you receive

01

Our Training Approach

Curricula built around roles, delivered alongside the work rather than after it.

Training that survives contact with the job.

Most corporate training fails for the same reason: it teaches a system rather than a role, and it arrives after the work has already changed. Everything in this catalogue is built the other way round.

Role-based curricula

Content is mapped to job function, so each cohort learns what it will actually use rather than a tour of every menu.

Delivered alongside build

Training runs in parallel with implementation, not as an afterthought at handover when attention has moved on.

Your data, your process

Exercises use your configuration, your terminology and your real scenarios wherever policy allows.

Measured, not assumed

Diagnostics before delivery and assessment after, so you can see the change rather than take it on trust.

Refresher cycles

Follow-up sessions keep capability current as systems, threats and regulations change.

Local and regional fluency

Delivered across the UAE and African markets with attention to language, infrastructure and compliance context.

TRAINING IN ACTION

A look inside our training sessions.

Moments from delivery, briefings and delegation sessions with the teams we have trained.

Program coordination session

Roundtable with delegation partners

Strategic briefing session

Leadership working session

Institutional planning workshop

Team review session

Photography is from live delivery and delegation programmes. Publication consent is confirmed before any image showing a client or delegation is used.

FORMATS & COVERAGE

On site, remote or hybrid — across seven countries.

Cohorts are typically 8 to 16 delegates. Larger populations are run in waves so the business keeps operating while people are trained.

On site

Delivered at your premises or a chosen venue, with equipment and materials provided.

Remote

Live instructor-led sessions in shorter blocks, suited to distributed teams.

Hybrid & delegation

Blended cohorts, plus hosted delegation and study-visit programmes.

DELIVERED IN

- | | | |
|----|----------------------|---------------|
| 01 | United Arab Emirates | Middle East |
| 02 | Ethiopia | Africa |
| 03 | Turkey | Europe / Asia |
| 04 | Singapore | Asia |
| 05 | Sweden | Europe |
| 06 | United States | North America |
| 07 | Canada | North America |

Delivery relationships across Africa additionally span Djibouti and South Africa.

02

Quality Assurance

An ISO 9001:2015 certified management system governing how programmes are designed, delivered and reviewed.

ISO 9001:2015 certified.

Our quality management system is registered by Veritas System Quality Certificates Issuing LLC and accredited by EIAC, the Emirates International Accreditation Centre, under the IAF multilateral recognition arrangement.

STANDARD	ISO 9001:2015 — Quality Management System
REGISTERED ENTITY	Infinite Icon Technology L.L.C, Deira, Dubai, UAE
CERTIFICATE No.	VSQC099-421263839
CERTIFICATION BODY	Veritas System Quality Certificates Issuing LLC
ACCREDITATION	EIAC · CB-QMS-099 · IAF MLA member
IAF / EA-NACE CODE	33-62.02 / 62.09 / 63.11
INITIAL CERTIFICATE	22 May 2026 · Issue No. 01
SURVEILLANCE DUE	21 May 2027 · three-year certification cycle

Validity is confirmed at veritasassurance.com and is subject to successful annual surveillance audit.

VERITAS

CERTIFICATE

OF REGISTRATION

This is to certify that the Management System of

Infinite Icon Technology L.L.C

Office No 203, Albahar, Al Khabeesi, Deira, Dubai, United Arab Emirates.

has been assessed and registered by Veritas System Quality Certificates as conforming to the requirements of

ISO 9001:2015

Quality Management System

The Quality Management System is applicable to:

- Service Provider of Data Management & Cyber Security Services, IT Infrastructure, Cloud Service & Datacenters Providers, Information Technology Network Services Datacenter Colocation Services.
- Data Classification & Analysis Services, Computer Systems & Communication Equipment Software Design, Internet Content Provider, Education & Training Computer Software, Social Media Applications Development & Management, Marketing Services Via Social Media, Portal, Electronic Chips Programming and Web-Design.

IAF/EA-NACE Code: 33-62.02/62.09/63.11

Certificate No : VSQC099-421263839

Initial Certificate Date : 22-05-2026

Surveillance due date / Expiry date: 21-05-2027

* Note: The validity of this certificate is subject to the successful completion of annual surveillance audit on or before the above-mentioned due date, and a new certificate will be issued. The certification cycle is 3 years from the certification date. If the surveillance audit is not done, then the certificate shall be suspended/cancelled.

Authorised Signatory

Veritas System Quality Certificates Issuing LLC

P.O. Box: 122982, Al Karama, Dubai, United Arab Emirates.

This certificate remains the property of Veritas System Quality Certificates Issuing LLC and must be returned on request. In the issuance of this certificate, Veritas System Quality Certificates Issuing LLC has no liability to any party other than to the client, and then only in accordance with the agreed upon certification agreement.

Validity of this certificate may be confirmed at www.veritasassurance.com, directly through QR code by using any device with correct information, or by email to admin@veritasassurance.com.

Issue No: 01

www.veritasassurance.com

The certified scope, as worded on the certificate.

Buyers in regulated sectors check scope, not just the badge. This is the registered scope in full, reproduced without paraphrase.

Certificate No. VSQC099-421263839

IAF / EA-NACE Code 33-62.02 / 62.09 / 63.11

THE QUALITY MANAGEMENT SYSTEM IS APPLICABLE TO

- Service Provider of Data Management & Cyber Security Services, IT Infrastructure, Cloud Service & Datacenters Providers, Information Technology Network Services Datacenter Colocation Services.
- Data Classification & Analysis Services, Computer Systems & Communication Equipment Software Design, Internet Content Provider, Education & Training Computer Software, Social Media Applications Development & Management, Marketing Services Via Social Media, Portal, Electronic Chips Programming and Web-Design.

What the certification changes for you.

ISO 9001 is a system standard, not a training accolade. These are the specific controls a certified system puts around your programme.

Documented scoping

Every programme starts from a recorded needs analysis and an agreed set of learning objectives, signed off before design begins.

Controlled materials

Course materials are version-controlled and reviewed, so two cohorts six months apart receive equivalent content.

Trainer competence records

Instructor qualification and subject currency are recorded and reviewed rather than assumed.

Measured feedback

Delegate evaluation and outcome data are collected every cohort and fed into the next revision.

Non-conformity handling

When something falls short there is a defined corrective process with an owner and a closure date.

Management review

Programme performance is reviewed at management level on a fixed cycle, with actions tracked.

03

The Programmes

Six programmes spanning foundational digital skills through to executive technology leadership.

Six programmes, plus bespoke development.

01

Digital Literacy & IT Fundamentals

Foundation

02

Cybersecurity Awareness

Foundation to Intermediate

03

ERP & Systems User Training

Role-based

04

IT Leadership & Strategy

Advanced

05

Data-Driven Decision Making

Intermediate

06

Customer Service Excellence

Foundation to Intermediate

07

Custom Training Development

Built to your requirement

Not on this list?

We design and build bespoke programmes against your own requirement — see the next page.

Every programme is re-scoped against your cohort, their starting level and your schedule before delivery.

Digital Literacy & IT Fundamentals

Foundational skills that bring every team member up to speed on core digital tools and ways of working.

AUDIENCE

All staff, non-technical roles

LEVEL

Foundation

FORMAT

On site · Remote · Hybrid

MODULES

- | | | | |
|----|--|----|---|
| 01 | Working in a modern digital workplace | 04 | Core productivity suite skills |
| 02 | Files, shared drives and version control | 05 | Effective search and source judgement |
| 03 | Email, calendar and meeting discipline | 06 | Digital etiquette and written communication |

ON COMPLETION, DELEGATES CAN

- ✓ Complete routine digital tasks without IT support
- ✓ Collaborate confidently in shared documents
- ✓ Organise files and inboxes to an agreed standard
- ✓ Recognise when a problem should be escalated to IT

Delivered in mixed-ability cohorts, with a short diagnostic before day one so pacing matches the room.

Cybersecurity Awareness

Practical training that helps staff recognise and respond to everyday security risks.

AUDIENCE

All staff, with an extended track for privileged users

LEVEL

Foundation to Intermediate

FORMAT

On site · Remote · Hybrid

MODULES

- | | |
|---|---|
| 01 The current threat landscape, in plain terms | 04 Handling sensitive data and classification |
| 02 Phishing, smishing and social engineering | 05 Device, remote working and travel security |
| 03 Passwords, MFA and credential hygiene | 06 Recognising and reporting an incident |

ON COMPLETION, DELEGATES CAN

- ✓ Identify and report a phishing attempt correctly
- ✓ Apply credential and MFA practice consistently
- ✓ Handle classified data according to policy
- ✓ Follow the incident reporting path without hesitation

Optional simulated phishing exercise before and after delivery, to give you a measurable change in click rate.

ERP & Systems User Training

Getting teams confident and productive on the platforms your business already runs on.

AUDIENCE

End users, super-users and system administrators

LEVEL

Role-based

FORMAT

On site preferred · Remote available

MODULES

- | | | | |
|----|---|----|---|
| 01 | Navigating your ERP environment | 04 | Approvals, workflow and internal controls |
| 02 | Master data discipline and why it matters | 05 | Reporting, extraction and reconciliation |
| 03 | Transaction processing for your role | 06 | Common errors and how to self-correct |

ON COMPLETION, DELEGATES CAN

- ✓ Process daily transactions unaided
- ✓ Maintain master data to an agreed standard
- ✓ Run and interpret the reports the role requires
- ✓ Resolve routine errors without raising a ticket

Built against your actual configuration and a sandbox of your own data — not a generic demonstration tenant.

IT Leadership & Strategy

Executive and management programmes that build confident, technically literate leadership.

AUDIENCE

Heads of function, IT managers and executive sponsors

LEVEL

Advanced

FORMAT

On site · Executive off-site

MODULES

- | | |
|---|---|
| 01 Translating business strategy into a technology roadmap | 04 Architecture literacy for non-architects |
| 02 Governance, risk and regulatory posture | 05 Running transformation programmes that land |
| 03 Budgeting, total cost of ownership and vendor negotiation | 06 Building and retaining technical teams |

ON COMPLETION, DELEGATES CAN

- ✓ Defend a technology roadmap to a board
- ✓ Assess vendor proposals critically
- ✓ Set governance proportionate to actual risk
- ✓ Sponsor a transformation with realistic milestones

Case work is drawn from the delegate's own organisation, so the output is a usable draft rather than an exercise.

Data-Driven Decision Making

Practical methods for turning everyday business data into better, faster decisions.

AUDIENCE

Managers, analysts and operations leads

LEVEL

Intermediate

FORMAT

On site · Remote · Hybrid

MODULES

- | | |
|---|---|
| 01 Framing a decision as an answerable question | 04 Reading trends, distributions and variance |
| 02 Data quality and where the numbers come from | 05 Dashboards that drive action, not decoration |
| 03 Spreadsheet and BI fundamentals | 06 Communicating findings to decision makers |

ON COMPLETION, DELEGATES CAN

- ✓ Frame a business decision as a data question
- ✓ Judge whether a number can be trusted
- ✓ Build a working dashboard for the team
- ✓ Present findings without overclaiming

Delegates work on a live dataset from their own function wherever data-sharing policy permits.

Customer Service Excellence

Service standards and soft skills training for customer-facing teams.

AUDIENCE

Front-line, contact centre, branch and field teams

LEVEL

Foundation to Intermediate

FORMAT

On site · Remote · Hybrid

MODULES

- | | |
|---|--|
| 01 Service standards and what good looks like here | 04 Service in digital, phone and branch channels |
| 02 Listening, questioning and de-escalation | 05 Handover between teams without dropping the customer |
| 03 Complaints and difficult conversations | 06 Measuring service and acting on feedback |

ON COMPLETION, DELEGATES CAN

- ✓ Apply a consistent service standard across channels
- ✓ De-escalate a difficult interaction confidently
- ✓ Handle a complaint through to resolution
- ✓ Use customer feedback to change how the team works

Role-play scenarios are written from your own contact logs and complaint themes.

Custom Training Development

When the requirement does not match a catalogue course, we build the programme from scratch — curriculum, materials, exercises and assessment — against your own systems, policies and regulatory obligations.

01

Capture

Workshops with the sponsor and the people doing the job, to establish what must change and how it will be measured.

02

Design

Learning objectives, module structure, exercise design and an assessment method agreed and signed off before build.

03

Build

Materials, workbooks, scenarios and trainer guides developed against your systems, terminology and policy set.

04

Pilot

A first cohort runs the programme, with observation and feedback feeding a documented revision.

05

Transfer

Delivered at scale, or handed to your own trainers through a train-the-trainer track.

Typical commissions

System-specific onboarding · Regulator-driven compliance training · Bespoke technical curricula · Induction and academy programmes

Train-the-trainer

We build the programme and certify your internal trainers to run it, so repeat delivery costs you nothing per cohort.

Materials ownership

Ownership and reuse rights for commissioned materials are agreed in writing at contract, not assumed afterwards.

04

Pathways & Tailoring

How the six programmes combine into role pathways, and how content adapts by sector.

Four pathways, built from the same six programmes.

Most organisations do not buy a single course. These are the combinations that come up most often, and the order we recommend running them in.

All staff

Baseline capability

01 Digital Literacy

02 Cybersecurity Awareness

System users

Platform adoption

01 Digital Literacy

03 ERP & Systems

02 Cybersecurity Awareness

Managers & analysts

Decision capability

05 Data-Driven Decisions

03 ERP & Systems

02 Cybersecurity Awareness

Leadership

Strategic capability

04 IT Leadership & Strategy

05 Data-Driven Decisions

Pathways are indicative. Final sequencing is agreed after the needs analysis in stage one.

Same programme, different room.

Scenarios, terminology, regulatory references and case work are rewritten for the sector in the room. A cybersecurity session for a bank is not the session a logistics operator receives.

Banking & Finance

Fraud typologies, customer data handling, regulator expectations

Government

Public records, procurement rules, citizen service standards

Energy & Utilities

OT and IT separation, field workforce, critical infrastructure

Telecommunications

Subscriber data, network operations, high-volume service

Insurance

Claims process integrity, document handling, customer disclosure

Logistics & Trade

Cross-border documentation, systems integration, exception handling

Education

Cohort-scale digital skills, safeguarding-aware practice

Enterprise & SME

Lean teams, generalist roles, cost-conscious sequencing

05

Running a Programme

From needs analysis to delegate assessment and the evidence pack you keep afterwards.

Four stages, run the same way every time.

What you hold at the end.

Training is easy to buy and hard to evidence. Every programme closes with a documented pack you can put in front of an auditor, a regulator or a board.

Produced under our ISO 9001:2015 certified quality management system.

Needs analysis & objectives

The signed scoping document the programme was built against.

Course materials

Delegate workbooks and reference guides, version-stamped and yours to keep.

Attendance & participation record

Per-cohort register suitable for HR and audit files.

Assessment results

Pre and post measures showing capability change, per delegate and per cohort.

Certificates of completion

Individual delegate certificates issued on successful completion.

Evaluation & recommendations

Delegate feedback, trainer observations and what we suggest next.

Tell us who needs training, and what changes if they get it.

Send us the roles, the cohort sizes and the outcome you are trying to reach. We will return a scoped programme, a sequencing plan and a cost, normally within one business day.
