01 · COMPANY PROFILE

About Us

Infinite Icon Technology is an IT consultancy based in Dubai. We started in 2022. We serve clients in the UAE and across Africa.

We work with banks, government bodies and growing businesses. These clients need technology that keeps up with their goals. We are their **technology partner, not only a supplier.**

Our Approach

We design and build the technology. We also train the people who will use it. Advice and training work together. This is why the change lasts after our project team leaves.

Our Promise

Every project ends in the same way. Your team can run the system without us.

HEADQUARTERS
Dubai, United Arab Emirates

Infinite Icon Technology L.L.C

IT Consulting

Infrastructure, cloud, security and systems.

Corporate Training

Training for each job role in 7 countries.

Payment Hardware and Software

POS terminals, TMS and payment platforms.

01 · COMPANY PROFILE

At a Glance

We are a young company with an experienced delivery team. We serve two regions from one main office.

2022 Founded in Dubai	**2** Regions served	**7** Countries trained in
8 Sectors served	**500+** POS terminals deployed	**ISO** 9001:2015 certified

We have trained teams in Turkey, Singapore, the UAE, the USA, Canada, Ethiopia and Sweden.

Where We Work

Our main office is in the UAE. We also deliver projects across Africa. We follow the same governance standards in both regions.

United Arab Emirates HOME BASE

Our head office is in Dubai. We serve clients across the Emirates in banking, government and business.

Dubai · Abu Dhabi · Sharjah

Africa DELIVERY REACH

We deliver corporate training and digital transformation projects across Africa. We work on site and remotely.

Ethiopia · Djibouti · South Africa

Range of Specialization

Our work falls into two practice areas. Each area supports the other.

IT Consulting

- Cybersecurity and Risk Advisory
- IT Infrastructure
- Cloud Solutions
- Managed Services
- POS, ERP and Cash Registers
- Software and Systems Development

Corporate Training

- Leadership and Presence
- Strategy and Governance
- Resilience and Risk (ERM)
- Banking and Treasury
- Digital Transformation
- Emotional Intelligence and Communication

Who We Serve

We serve regulated sectors where the stakes are high. In these sectors, system downtime, compliance gaps and untrained staff have a real cost.

Banking and Finance
Digital banking, payments and compliance

Government
Digital services for the public sector

Energy and Utilities
Modern infrastructure and operational technology

Telecommunications
Advice on networks and systems

Insurance
Process automation and risk

Logistics and Trade
Systems integration

Education
Digital skills programmes

Enterprise and SME
Full digital transformation

02 · PRACTICE AREA 01

IT Consulting

We give advice, build infrastructure and provide support. Your systems stay secure, up to date and running.

Cybersecurity and Risk Advisory

We assess risks, design security systems and train your staff. This lowers your risk and keeps your business moving.

IT Infrastructure

We design, install and support networks, data processing, storage and system operations. We handle every step from start to finish.

Cloud Solutions

We move your systems to the cloud. We also plan and manage your cloud setup. We work with public, private and hybrid cloud.

Managed Services

We monitor, maintain and support your systems every day. Your own team can then focus on the business.

POS, ERP and Cash Register Support

We supply, install and support point of sale, ERP and cash register systems. We cover both the hardware and the software.

Software and Systems Development

We build custom applications and connect your systems. Your technology then matches the way your business really works.

02 · SERVICE SPOTLIGHT

POS, ERP and Cash Registers

We supply, install and support your systems. You have one partner for purchasing, rollout, integration and support.

We manage point of sale, ERP and cash register systems from start to finish. This covers all hardware and the software that runs on it. ICON is our own range of certified terminals. Our team sets up, installs and maintains every ICON terminal.

01

Supply and Purchasing

We help you choose terminals from the ICON range. We plan the right number and type for your needs.

02

Deployment and Installation

We install the terminals on site and set them up. We load the security keys and train your staff.

03

Integration and Software

We connect the terminals to your ERP, cash register and back office systems.

04

Maintenance and Support

We monitor terminals, supply spare parts and fix faults. We also give refresher training to users.

03 · PRACTICE AREA 02

Corporate Training

We offer programmes for executives and managers in banks and financial institutions. Expert international trainers deliver every programme.

Leadership and Executive Presence

This area includes Executive Leadership Presence and Women in Leadership. We help leaders at every level of the bank grow in confidence.

Strategy Execution and Governance

We show teams how to turn strategy into results. We also teach the governance rules that keep boards and managers responsible for delivery.

Organizational Resilience and Enterprise Risk

This area covers Organizational Resilience and Enterprise Risk Management (ERM). We prepare institutions to expect problems, handle them and recover quickly.

International Banking, Treasury and Capital Markets

This area covers International Banking, Mastering Treasury Functions and Capital Markets. These subjects support the bank's balance sheet and its business across borders.

Digital Transformation and Innovation

We show how banks plan, lead and deliver digital change. Topics include customer channels, operating models and a culture of new ideas.

Emotional Intelligence and Communication

This area covers Emotional Intelligence for Bank Management and Communication Skills. It is for managers who lead people and manage client relationships.

Delivered in Seven Countries

We run programmes on site and remotely. We adapt each programme to the language, infrastructure and regulations of each group we train.

Group roundtable during a programme

Training session during a programme

01 Turkey	Europe and Asia	**05 Canada**	North America
02 Singapore	Asia	**06 Ethiopia**	Africa
03 UAE	Middle East	**07 Sweden**	Europe
04 United States	North America		

Training by Job Role

We match the content to each job. Each group learns the skills it will really use.

Training During the Project

Training runs at the same time as the project. It is part of the plan from the start.

Refresher Sessions

Extra sessions keep skills current. Systems and threats change, so learning continues.

04 · CORE ADVANTAGES

How We Work

We follow four stages every time. The order matters. We assess first. Then we train your team while we build, not after.

STAGE 1
Assess

We review your systems, skills and processes. We compare them with your business goals. Then we find the best place to start.

STAGE 2
Design

We design the technical solution and the training plan together. Your team builds skills from the first day.

STAGE 3
Deliver

We install the infrastructure, software and platforms. At the same time, we train your team.

STAGE 4
Sustain

We provide support, refresher training and regular plan reviews. Your results keep growing after launch.

> ***Assess before you build. Train while you build. Support after launch.***

05 · WORKING WITH US

Engagement Models

There are three ways to start. Each one has the same high standard.

Advisory

A focused project to review, plan or reduce risk in one part of your technology.

- Review of current systems
- Target design and roadmap
- Security and compliance review
- Vendor and platform selection

Delivery

A full setup of infrastructure, platforms or systems. Training runs at the same time.

- Infrastructure and cloud setup
- Software and systems development
- POS, ERP and cash register rollout
- Support after launch

Training

A complete programme for one team or group. We shape it around job roles. We deliver it on site or remotely.

- Needs assessment and group planning
- Custom training content
- On site or remote delivery
- Refresher sessions after the programme

> ***Every project ends in the same way, whatever model you choose. Your team can run it without us.***

Payment Software Platform

IIT also provides the software behind the hardware. This software keeps your terminals secure, up to date and profitable. It runs in the cloud or on your own servers.

Application Marketplace

This is one IoT platform for terminal management, app management and extra services. It brings together acquirers, operators, app developers, software vendors (ISVs), asset managers and merchants. Everyone works in one open system.

Terminal Management System (TMS)

Manage, deploy, monitor and support all your terminals from a distance. The system works with every terminal type. This includes terminals from other makers that are already in use.

Easy terminal management

Deploy one terminal or many at once. Choose from flexible settings.

Complete app management

Upload, publish, search and update apps from one screen.

Live monitoring

Check device status. Set up and maintain terminals from a distance.

Flexible user management

Give each user the right access level. This protects data and supports compliance.

Smart operations

Use monitoring data to make faster and better decisions.

Public or private setup

Use our hosted cloud service, or run a private version at your site.

Security and Remote Support

Remote Key Injection (RKI)

Send payment keys to many POS terminals at once. The keys travel over secure, encrypted channels that meet PCI standards. No technician needs to visit. Every terminal meets the latest certification rules.

Remote key download

Load keys into many terminals at once from the back office.

Lower labour cost

Staff do not need to visit each terminal.

Central certificate management

Manage all keys and certificates in one place.

Data security

Strong encryption keeps keys private and safe from changes.

Remote Assistance

Our support team can reach POS terminals through the management platform. We fix merchant problems right away. No site visit is needed.

Remote diagnostics

Find the exact problem and fix it.

Remote desktop control

Control the terminal online to solve problems.

Encrypted tunnel

A secure connection protects every session.

Remote log extraction

Get live or past logs to find the cause of a problem.

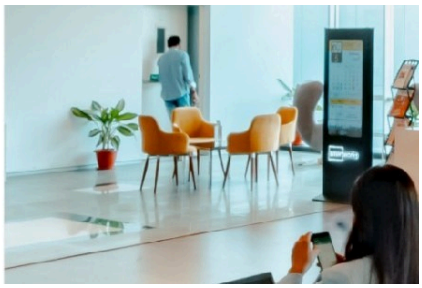

Integration and Acceptance

Cloud ECR Integration

The cash register creates an order. The order goes over a wireless network to a cloud platform. The platform then sends it to the POS terminal for payment. You need no cables and no drivers.

Wireless

No cables or drivers between the till and the terminal.

Works with any terminal

Connects to any brand of POS terminal. We recommend 4G.

Fast push

Orders and results arrive in seconds.

SoftPOS (Tap on Phone)

This turns an Android smartphone into a secure terminal for contactless payments. It meets the MPoC standard. It also checks security all the time.

- Card, QR code and digital wallet payments
- Receipts by email or SMS
- Needs Android 10 or later with NFC built in

Acquiring and Switching Platform

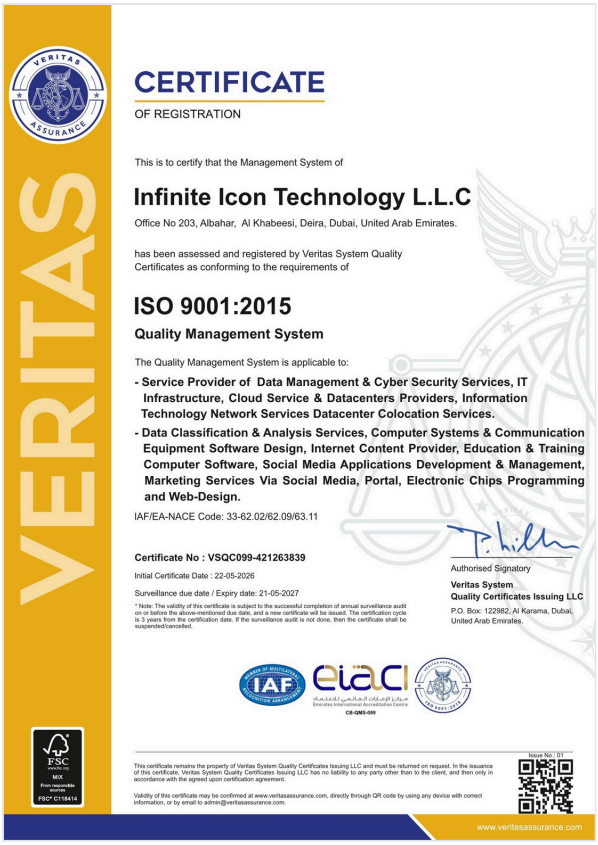

Card issuing and acquiring services for banks and payment companies.

- Merchant, terminal and card management
- Transaction routing and risk control
- Clearing, settlement and reports

07 · QUALITY ASSURANCE

ISO 9001:2015 Certification

Infinite Icon Technology L.L.C meets the **ISO 9001:2015 standard for Quality Management Systems.** An independent body has assessed and registered our company.

Scope of Certification

The certificate covers data management and cybersecurity services. It also covers IT infrastructure, cloud and data center services, and IT network services. Other services in scope are data classification and analysis, and software design for computer systems and communication equipment. The last areas are education and training, application development and web design.

08 · WHY INFINITE ICON

Why Choose Us?

Focused on you

We shape every solution around your team, your budget and your regulations. We do not use a standard template.

Built to grow

Our systems and training programmes grow with you. They extend easily into new markets and business lines.

Regional knowledge

We understand local infrastructure, compliance rules and talent in the UAE and Africa.

Certified quality

Our ISO 9001:2015 quality system guides how we plan, deliver and improve.

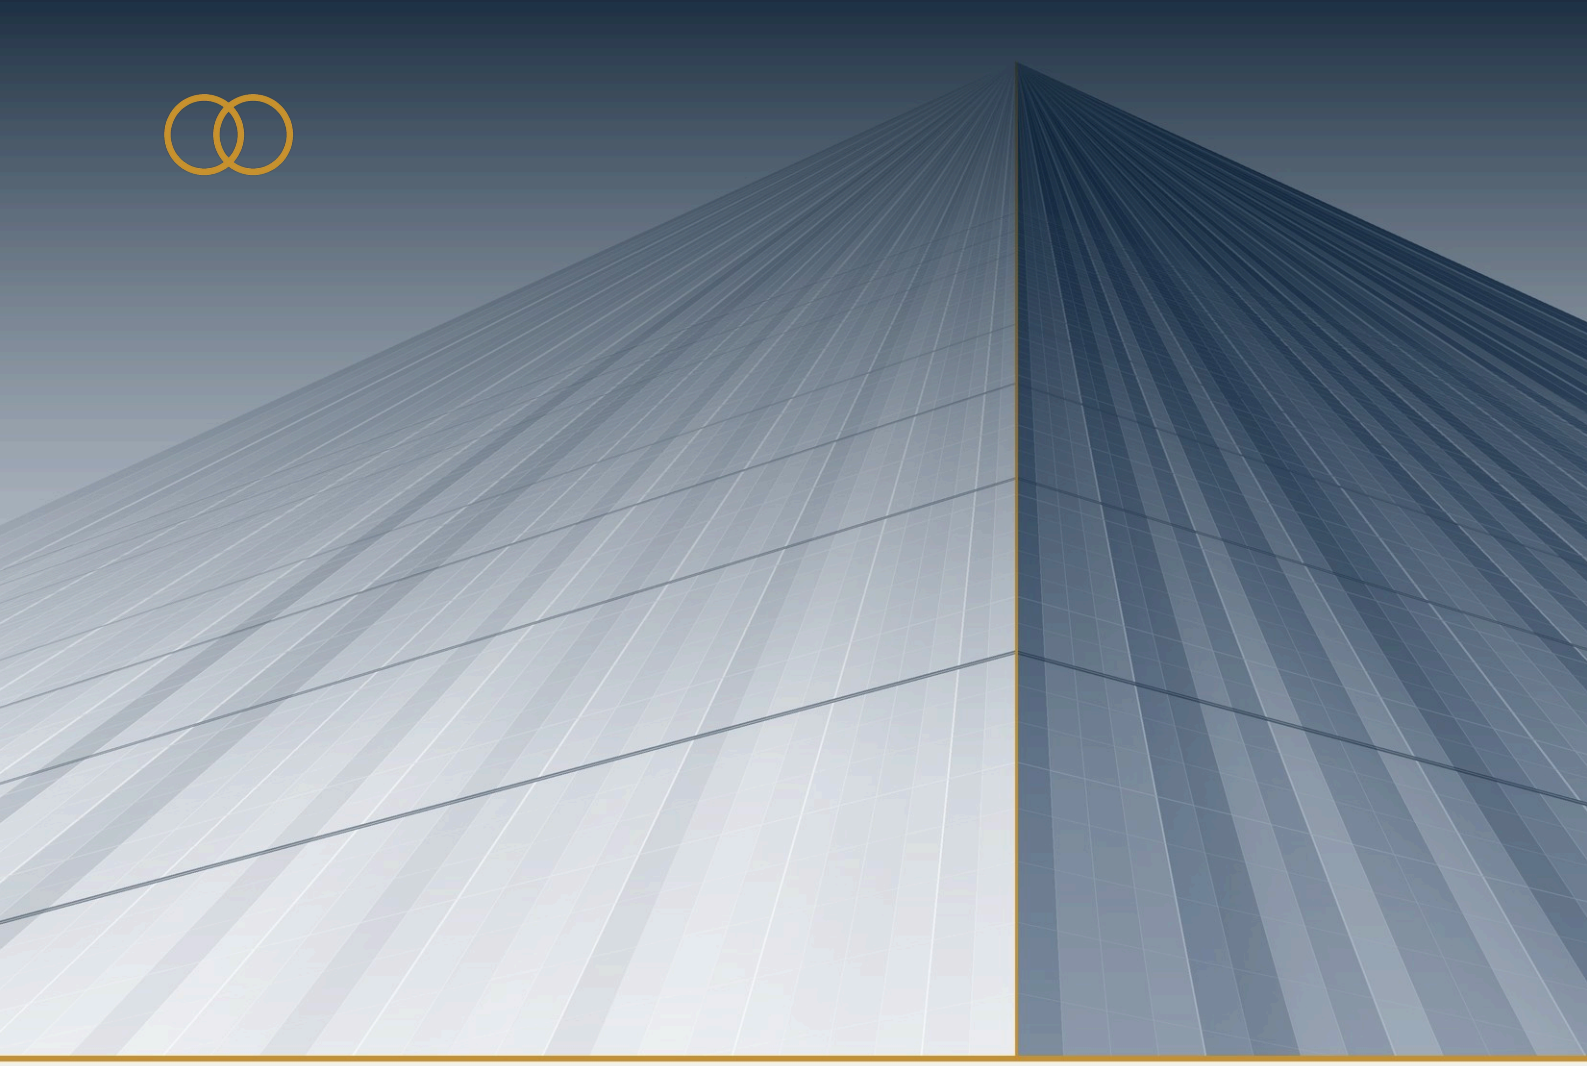

Proven in banking

We have deployed more than 500 POS terminals. We have also delivered executive programmes for leading banks and financial institutions.

One partner

One team handles purchasing, rollout, integration, training and support. We stay with you from start to finish.

"Advise. Deliver. Train. Sustain."

LET'S WORK TOGETHER

Ready to build the skills for your next big change?

Tell us about your training needs or your technology plans. Our team will reply to you directly. We usually reply within one business day.
